Career Objective

Aspiring MERN Stack Developer with a strong foundation in frontend technologies like React.js, Redux, JavaScript, HTML, and CSS. Completed a 2-month internship at Ferns N Petals, working on real-world UI projects. Eager to grow into a full-stack role by mastering backend technologies such as Node.js, Express, and MongoDB.

Education

Bhagwan Parshuram Institute of Technology (BPIT)   **2022 − Present**
Bachelor of Technology in Computer Science   *Delhi, India*

Relevant Coursework

- Data Structures
- Web Development
- Operating Systems
- Algorithms Analysis
- Database Management
- Software Engineering

Experience

Ferns N Petals Pvt. Ltd. (FNP)   **June 2024 − August 2024**
Frontend Developer Intern   *Remote*

- Worked on the development of **FNP 2.0**, a redesigned e-commerce website focused on improved UI/UX.
- Built responsive and reusable components for homepage and product pages using **React.js, Tailwind CSS, JavaScript**.
- Used **Redux** to manage application state and ensure consistent behavior across components.
- Focused on mobile-friendly layout design and clean, modern interface.

Projects

FNP 2.0 Frontend UI (Internship Project) | *React.js, Redux, Tailwind CSS, JavaScript*   **July 2024**
- Contributed to the UI revamp of FNP's e-commerce platform.
- Implemented interactive elements like product carousels and category layouts.
- Worked on building scalable components with consistent state handling using Redux.

Personal Portfolio Website | *HTML, CSS, JavaScript, React*   **January 2025**
- Designed and developed a fully responsive personal portfolio to showcase my projects and resume.
- Added smooth scrolling, animation effects, and downloadable resume section.

Custom Music Player Web App | *HTML, CSS, JavaScript*   **February 2024**
- Built a responsive music player interface with play, pause, skip, and volume control functionality.
- Used JavaScript to control audio playback, update the UI in real-time, and handle events.
- Added features like song duration display, seek bar, looping, and basic playlist functionality.

Weather App | *React, TailwindCSS, Axios, OpenWeatherMap API*   **February 2024**
- Developed a sleek, real-time weather application with a modern glass-morphism UI and smooth animations.
- Implemented features such as temperature, humidity, wind speed, air quality, and sunrise/sunset data with accurate timezone handling.
- Integrated OpenWeatherMap API using Axios for real-time weather data, along with error handling and data caching for performance.
- Built modular React components for hourly/daily forecasts, temperature graphs, and interactive user experience across devices.

Technical Skills

Languages: JavaScript, HTML, CSS, Python, C++
Frontend: React.js, Redux, Tailwind CSS, Bootstrap
Backend (Learning): Node.js, Express.js, MongoDB
Tools: Git, GitHub, VS Code, Figma, Chrome DevTools
